

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

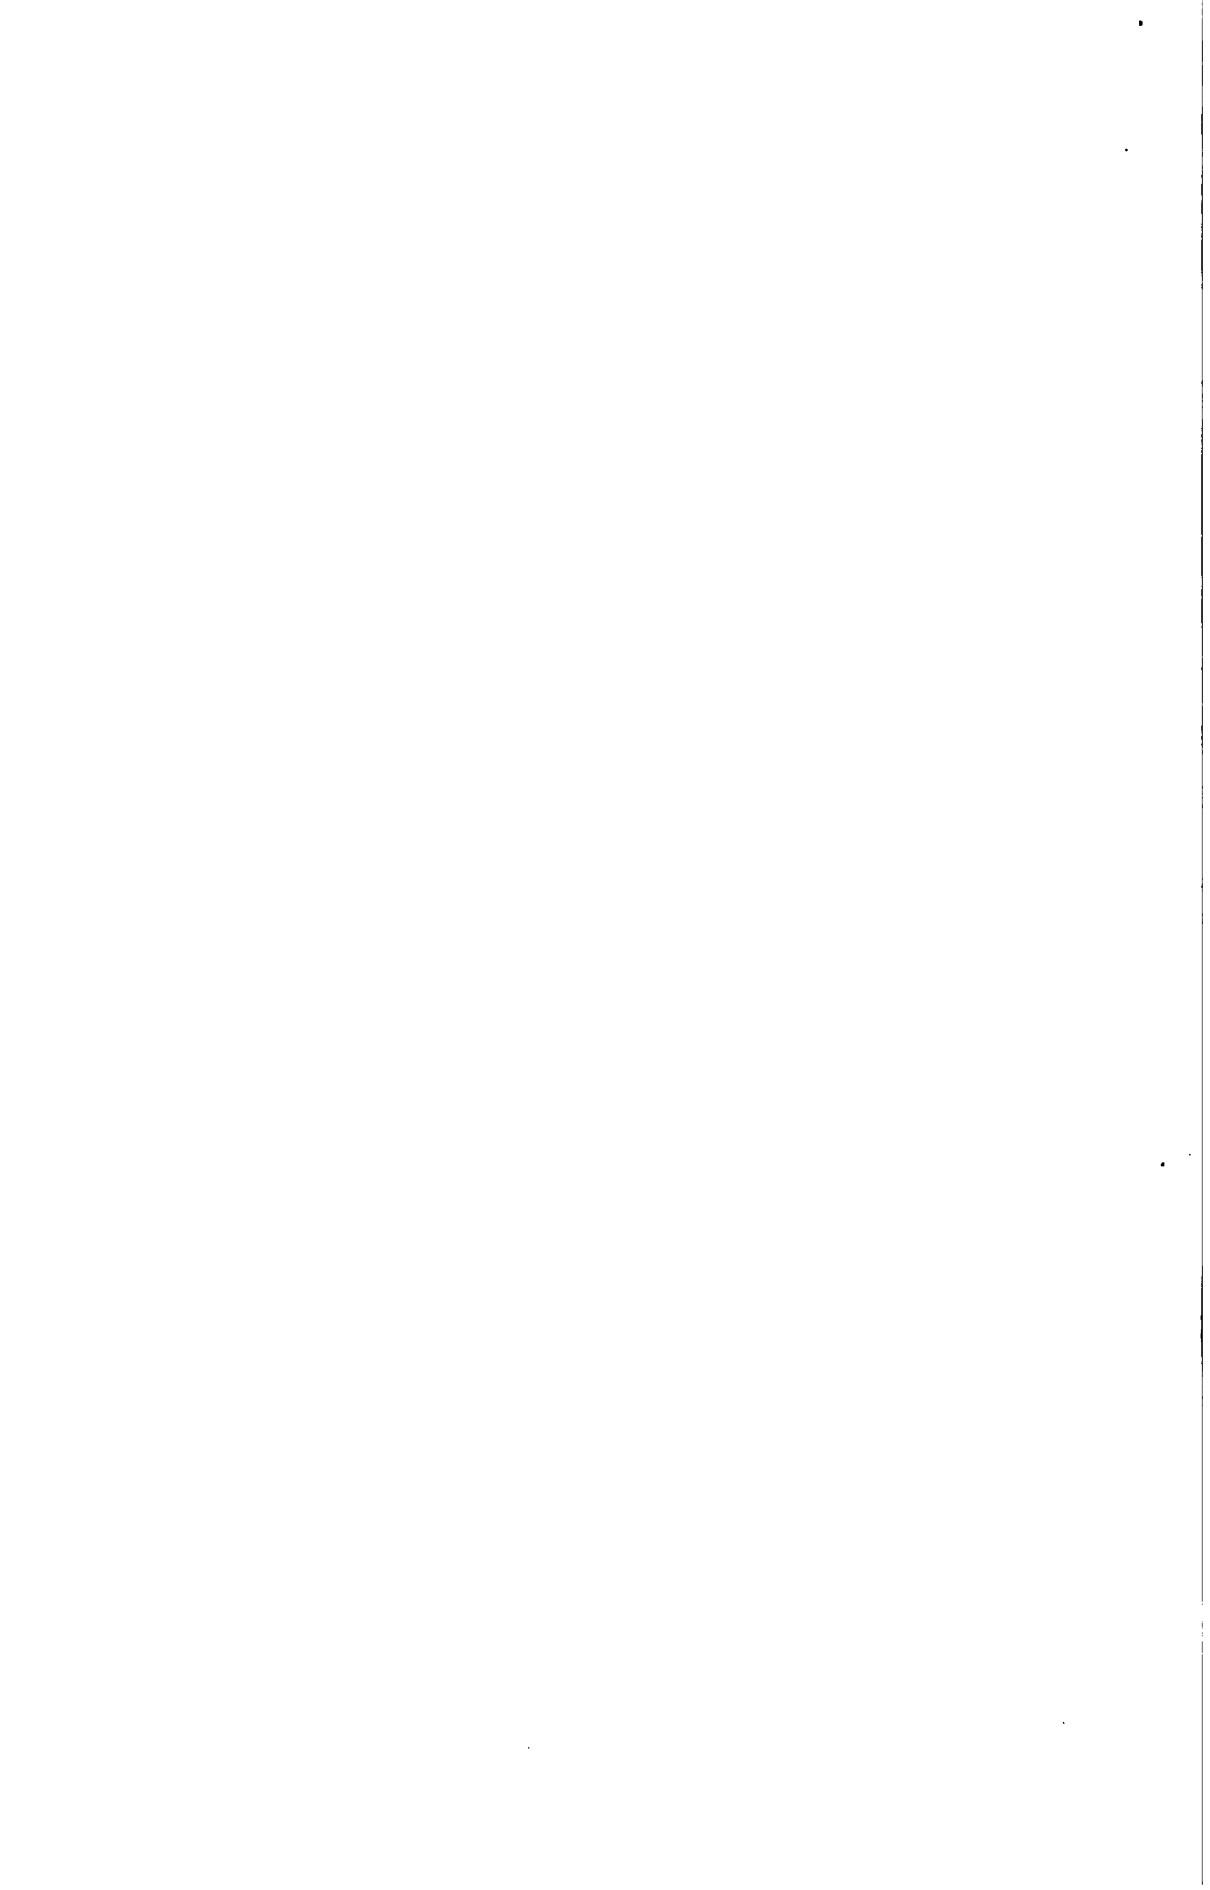

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

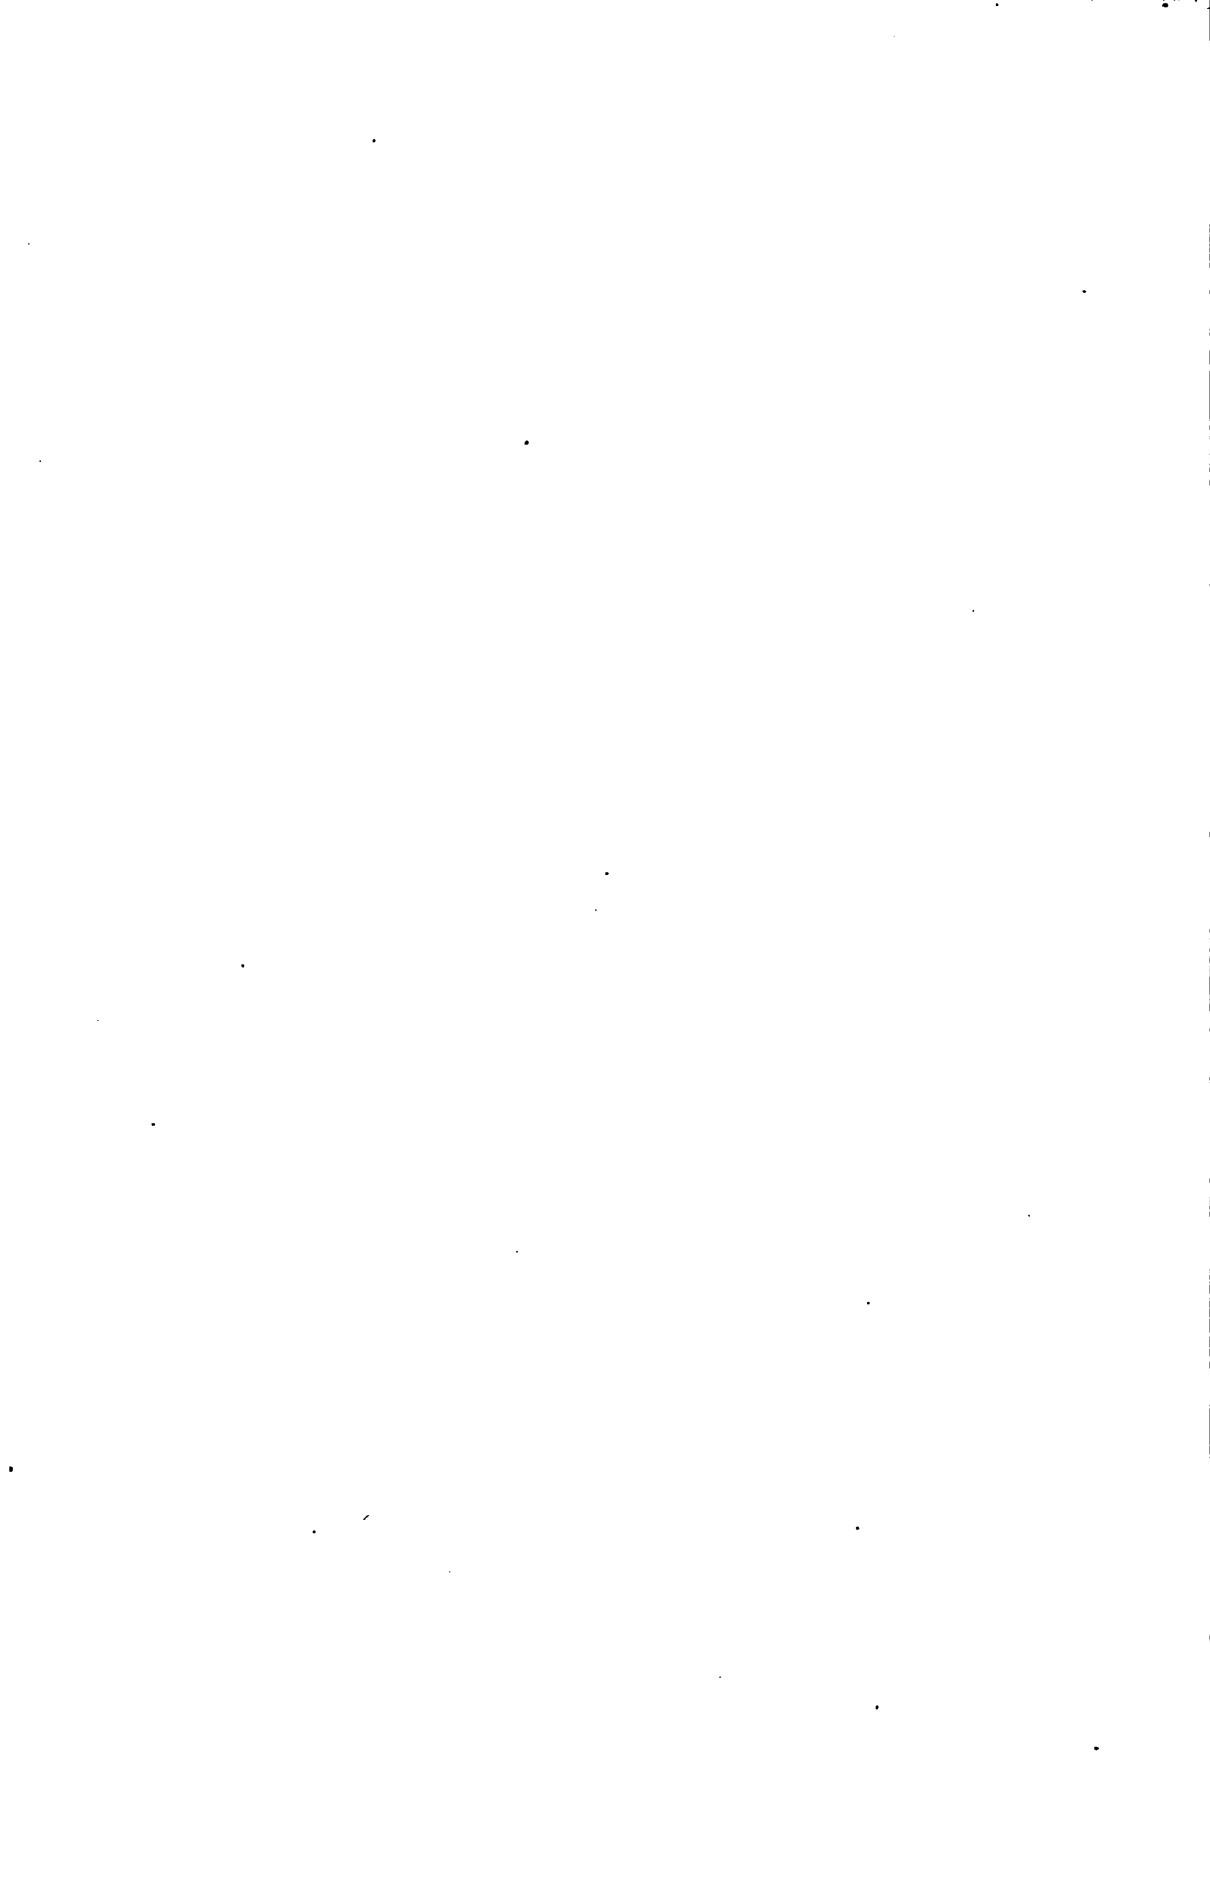

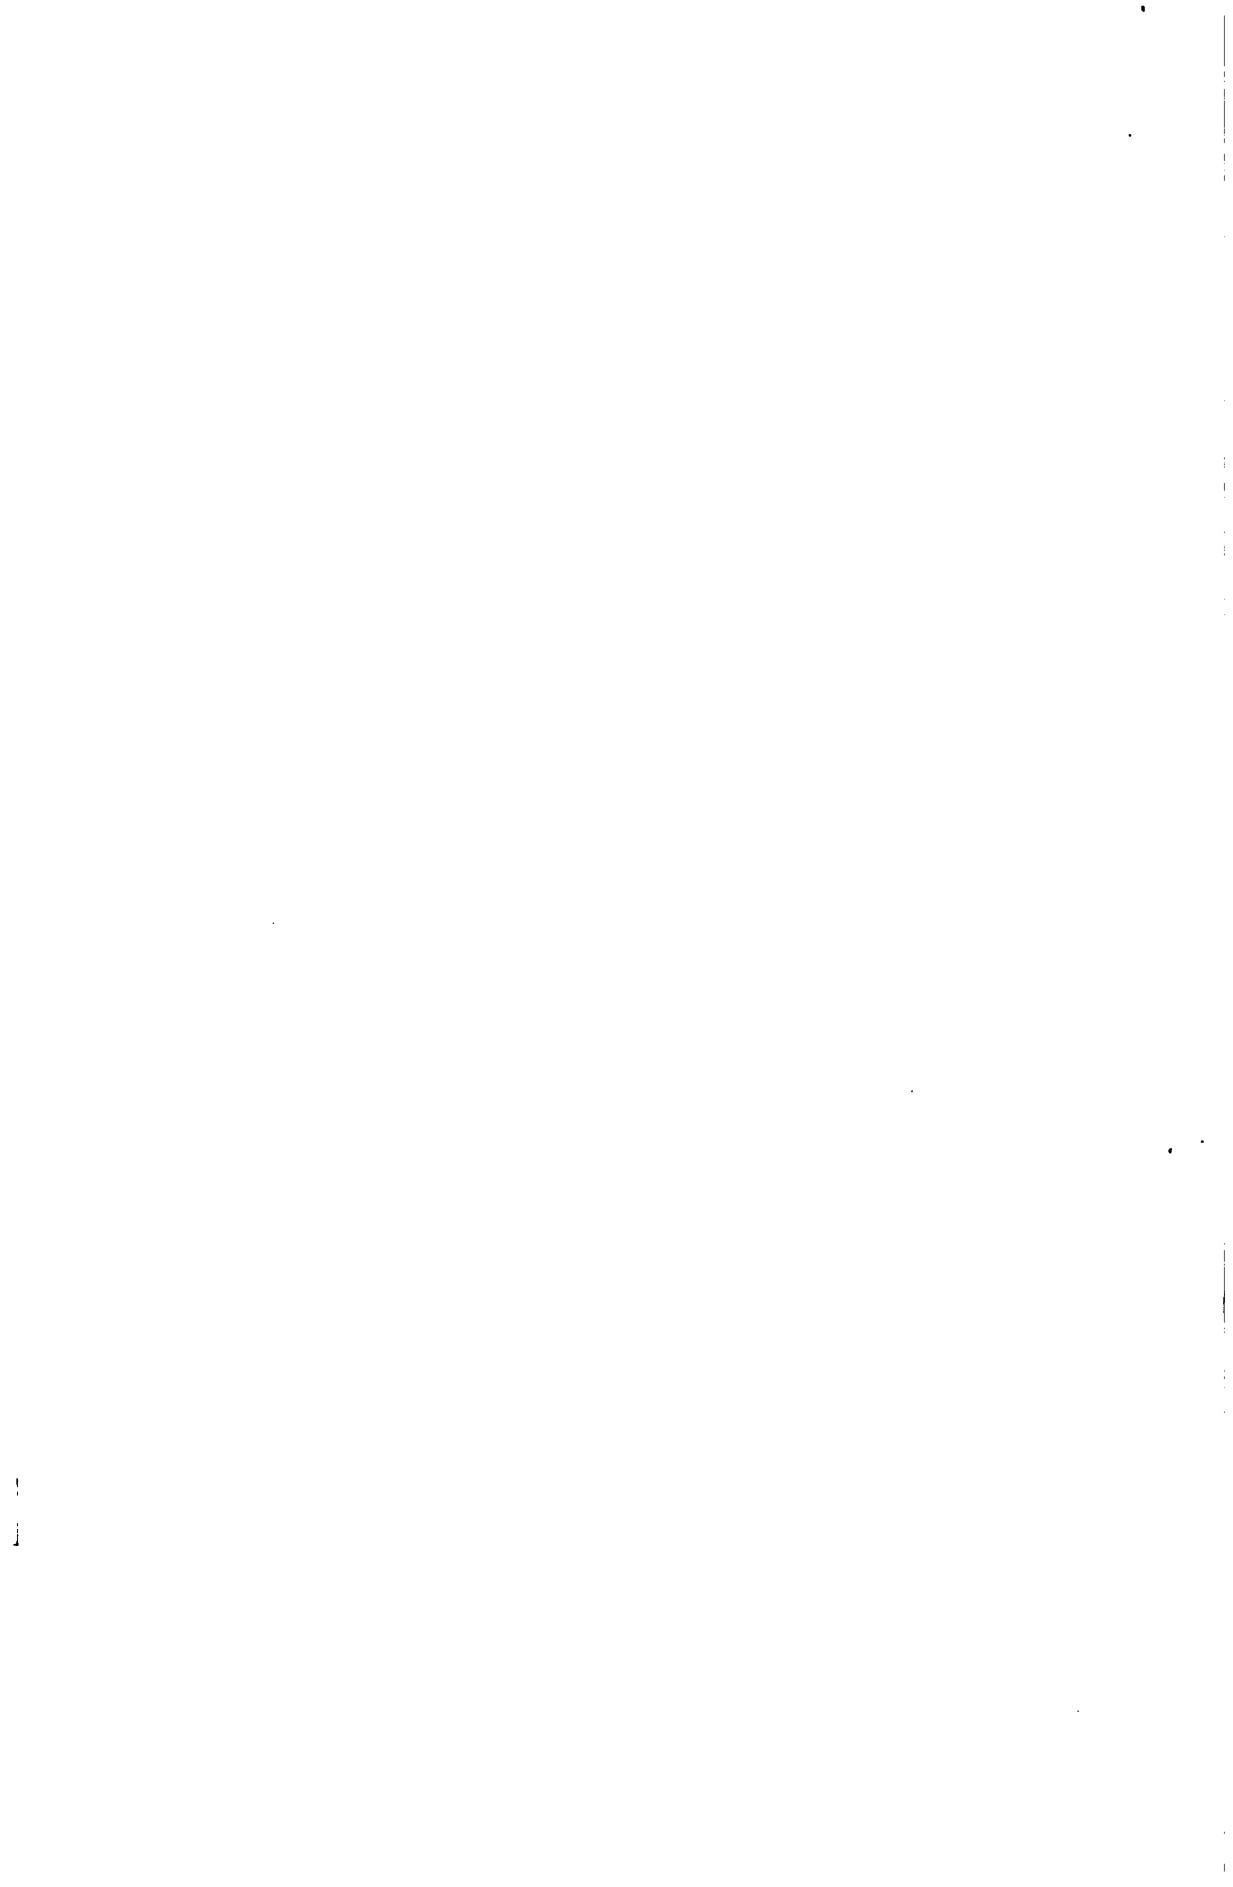

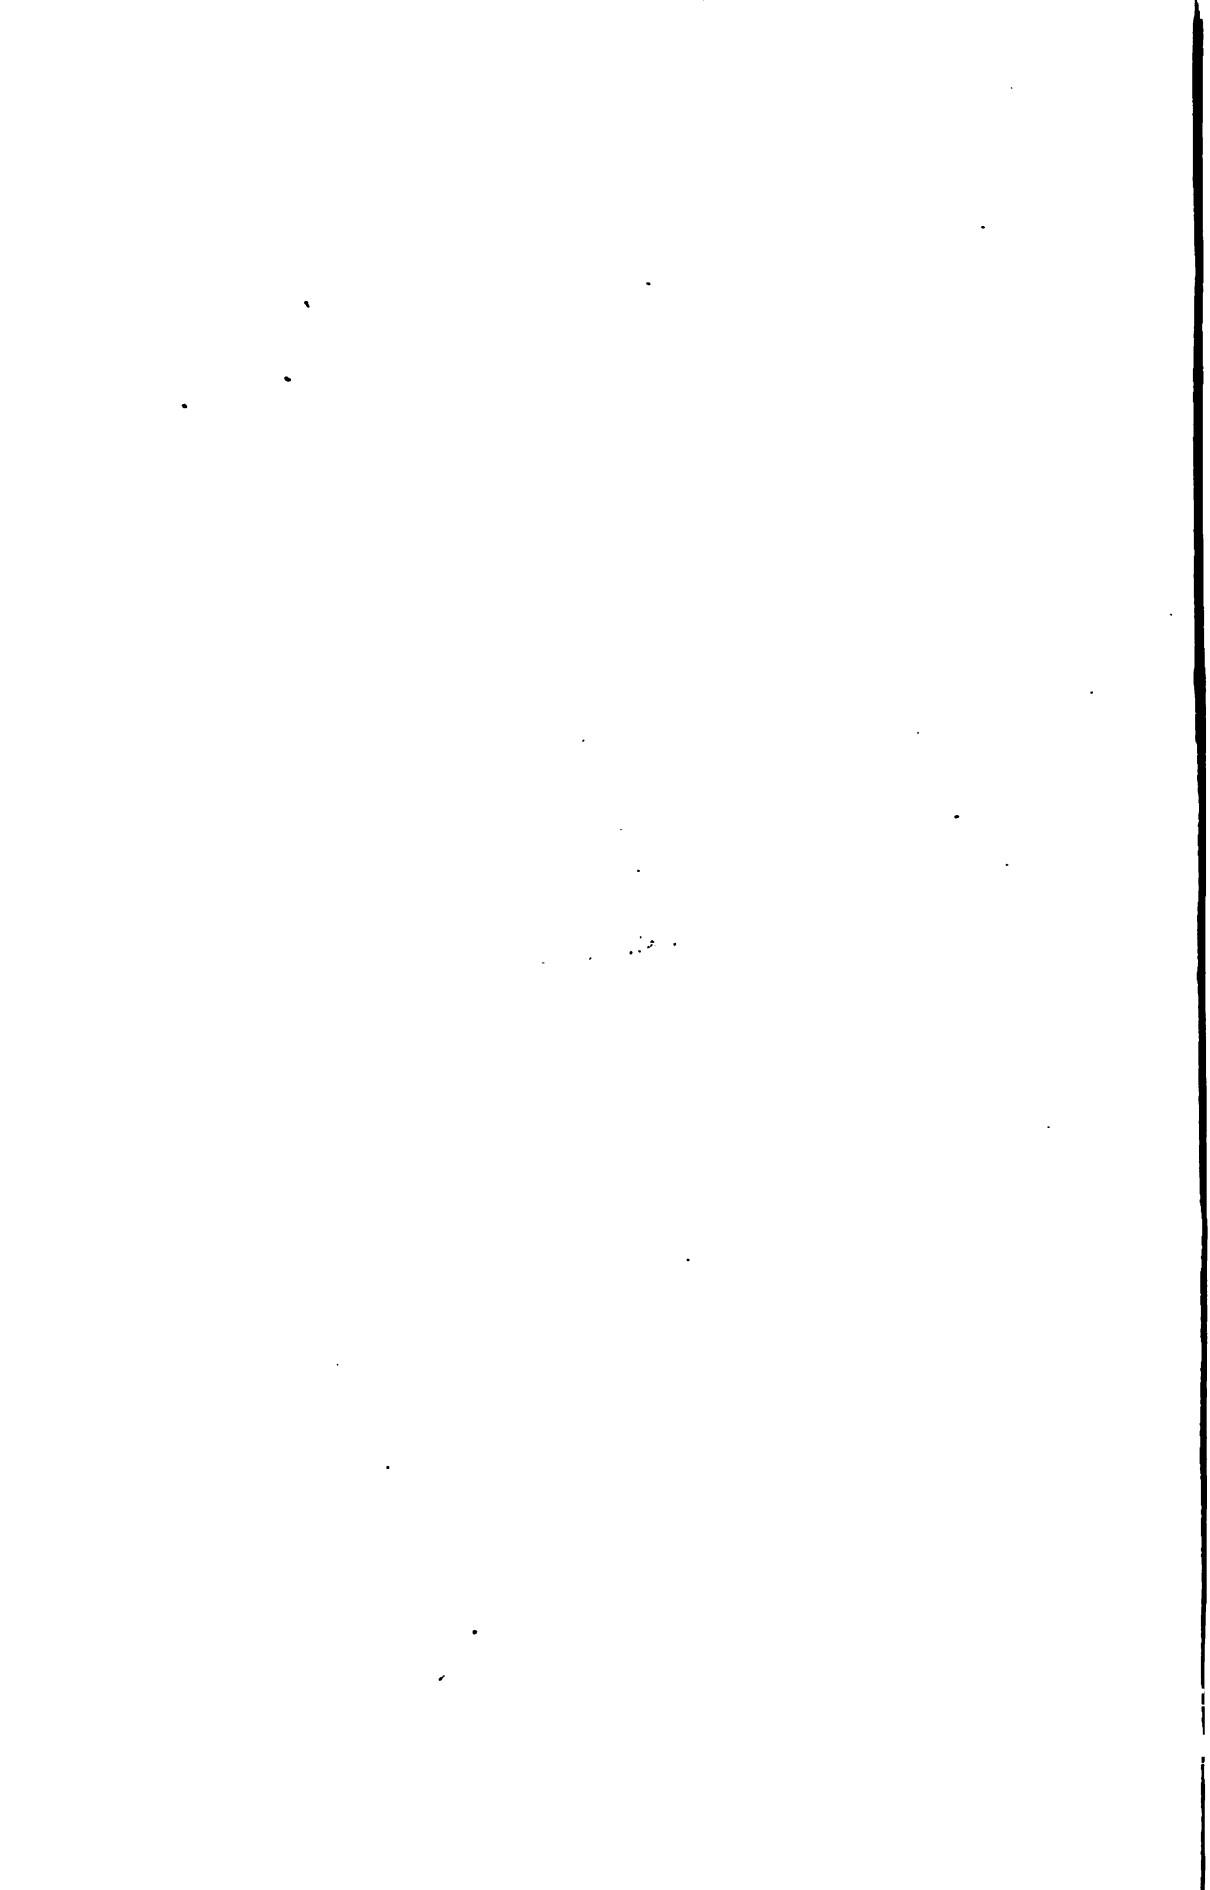

A CONCORDANCE

## PREFACE.

---

This volume is an attempt to collect the adjudged cases in the reports of the United States (State and Federal), Great Britain, and the Colonies, in which Words and Phrases have been construed and Definitions of Legal Terms have been made or approved. Every one who has examined the subject must have noticed how rare a thing it is to find a volume of legal reports whose Index contains such a title as "Words and Phrases" or "Definitions." Except in some score of the earlier volumes of the English Common Law Reports and the current reports of the English Incorporated Law Society, the reporters have, with a surprising unanimity, completely neglected these important topics. It is even worse in the American Reports. Our reporters, down to within a very late period, apparently never thought of the expediency of incorporating such a title into their books, and until the last ten years, it was impossible to find a volume of American decisions in which a separate place was given to these important subjects. The digesters have followed the reporters in this omission, and the result is that with the exception of the current reports of Massachusetts, New York, and a few other States, there is no key to the multitude of decisions in which Words and Phrases have been construed by the courts of this country.

In the legal dictionaries some slight attention has been incidentally paid to these topics. But the legal dictionaries are restricted to the definitions of legal terms; and even where their authors have attempted to include Common Words which have been interpreted by

---

courts, they have not gone very far in this direction. As a striking proof of this, I would point out that this CONCORDANCE cites no fewer than 30,205 cases (25,255 in the body of the work, and 4,950 in the Appendix), and that of these, at least 20,000 had never been brought together before in any work, their existence being ascertained by me only through a page by page examination of several thousand volumes of legal reports.

In adopting the form of a Concordance instead of that of a Dictionary, I have had two reasons. In the first place, had I attempted to give even the briefest reference to the construction of the word as given in each case cited, this book would have grown to four, or even five volumes,<sup>1</sup> and could not have been published except at a greatly enhanced cost to the purchaser. Secondly, so short a digest of a case would not be satisfactory. The lawyer finding that there is a case construing a word whose interpretation he desires to obtain, will not be satisfied with a bare statement of the construction. For example, the question is, whether on a proper construction of a contract to pay the "crew" of a vessel a certain amount of money, the officers of the boat are to be included. In my CONCORDANCE, turning to the title—CREW—he will find the cases in which this word has been judicially construed. If in the attempt to give a digest of each case I had extended this work to four or five volumes, he would have learned, in addition to this, that "Under a United States Statute punishing a revolt by a 'crew' of a vessel, the officers are included." But this information would be hardly more satisfactory than the first. He would want the original report of the case, in order to find the reasons given by the Court for this construction, the arguments of the opposing counsel on the question, the connection of the words in the statute, etc. Therefore, whether using the CONCORDANCE on my plan or on a more extended plan, he would not rest until he had read the case in which this interpretation had been given to the word. My

---

<sup>1</sup> A little reflection will show the truth of this statement. To simply cite the case requires not much less on an average than one line; while to give any idea of the point decided in each case would require not less, and generally more than four lines.

---

work gives the lawyer the *adjudged cases* in which Words and Phrases have been construed, and this plan, in a day when the object of digesters and text-book writers is in the main to refer the searcher to precedents, will, I think, best accomplish this object.

I make no claim to have discovered *all* the cases, nor do I imagine that my book is complete. *A work of this kind is never finished.* It has been in press nearly a year, and during that time I have discovered nearly 5,000 cases,—some of them published since the manuscript went to the printer, some of them old cases which I have since come across for the first time,—which cases I have fortunately been able to add in the Appendix. (Part III.) All I ask of the profession, is a recognition of the labor of several years which has resulted in bringing together in one volume over 30,000 decisions on this subject, most of which, on account of not being separately collected in either the index to the reports or in the digests, were almost as inaccessible to the profession as though they had never been decided, and were hardly to be discovered, except by accident. This I do claim for my book; no more, no less; and on this I rest my hopes to have in some considerable degree lessened the labors of the noble profession of which I am proud to be a humble member.

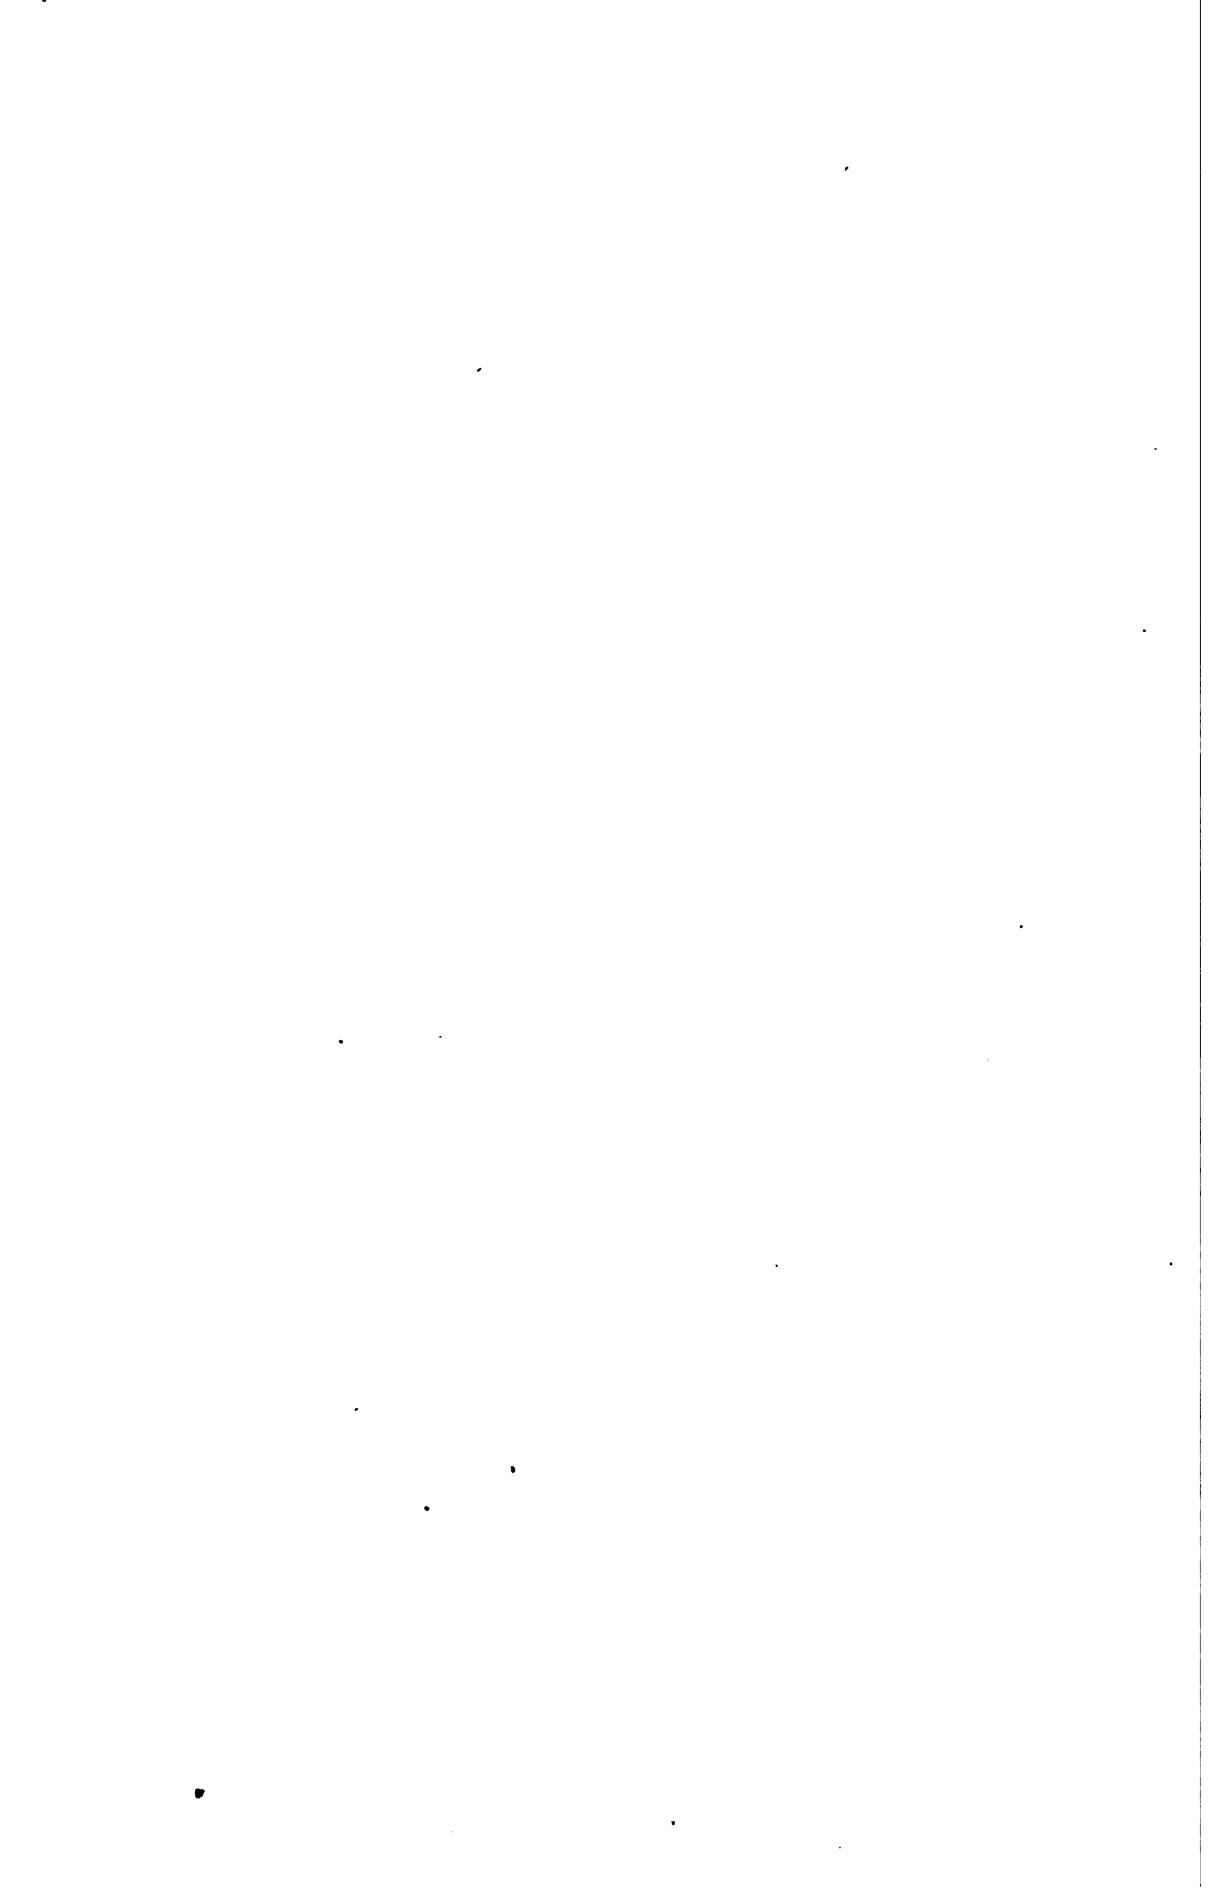

J. D. L.

St. Louis, March, 1883.

## PART II.

# CROSS REFERENCES.

---

The cross references which follow enable one, after finding the construction of a particular word or phrase in Part I., to find where the same word or phrase has occurred under another heading.

ILLUSTRATION.—Suppose the word that is being searched for is "Accident." Turning to the body of the book, Part I., pp. 3, 4, the different cases in which the word "ACCIDENT" has been defined by itself and also in connection with other words, will appear. Now turn to Part II. Here, under "Accident," the following phrases containing the word will be discovered, viz.: "Other unavoidable accident. Unavoidable accident, necessity or distress of weather. Unavoidable accident. Mistake or accident. Mistake, accident or misfortune. Surprise, accident, mistake or fraud without fault on his part. Injury caused by accident. Inevitable accident." The black type refers the reader to the word under which he must look in Part I.; and, therefore, looking there under the heads "**"UNAVOIDABLE,"** "**"MISTAKE,"** "**"SURPRISE,"** "**"INJURY,"** and **"INEVITABLE,"** he will find the above phrases.

## CROSS REFERENCES.

---

<b>A.</b>	Profit a prendre.	<b>ABOVE.</b>	In payment of the above account.
<b>ABANDONED.</b>	Derelict and abandoned.		To cross lot above mentioned.
	Cause shall be considered as abandoned.	<b>ABRIDGMENT.</b>	Fair abridgment.
